Key Learnings:

- **82% of total budget is invested in video**, which remains the most scalable and performant format, delivering **39% NMC**.
- **Static formats (15% of spend)** generate decent CTR but underperform down-funnel, resulting in **51% NMC**.

Recommendations :

- **Maintain a video-first creative approach** as the primary growth driver.
- Use static formats **selectively** for testing, message validation, and tactical support.

Which Creative Buckets Scale — and Which Stall?

Row Labels	⌵	Spend%	Spend	CTR	CVR	CPL	CPS	CPI	NMC	Net Volume
Creator Content		57.88%	\$4,074,414.00	0.58%	6.57%	\$67.98	\$406.02	\$495.31	42%	\$9,694,985.10

Key Learnings:

- **Creator-led content** accounts for **57% of total investment** and outperforms average performance across nearly all metrics, with marginal **+1% NMC**, making it both **effective and scalable**.
- **Core brand ads** deliver the **healthiest NMC at 34%**, driven by long-running, proven creatives that continue to generate efficient results.
- **Campaign-specific (primarily promotional) ads** drive strong CTR and CVR but fail to sustain performance further down-funnel.
- **UGC-style ads** drive strong CTR but degrade significantly down-funnel, resulting in the **highest NMC at 56%**.
- **Affiliate content** shows promising CTR and efficient NMC, but limited investment prevents full performance validation.

Recommendations :

- **Prioritize Creator and Core ads** as the backbone of the creative portfolio.
- **Limit UGC to controlled testing environments** or upper-funnel use cases.
- **Re-test Affiliate content** with clearer funnel intent and scaled pilots.
- Position Campaign-specific creatives as **tactical levers**, not long-term growth drivers.

Recommendations :

- Continue partnership with Phil and Mike
- Add creator in-frame footage to Voice Over (VO) video.
- Optimize Mari, Daniel and Ally (spend less).

Key Learnings:

- **Non-promo ads** underperform on on-platform engagement metrics but **outperform promo ads across all down-funnel KPIs**, indicating higher-quality demand.
- **Promo ads** generate strong CTR and CVR but lose efficiency post-conversion.
- **77% of promo spend is allocated to prospecting**, where NMC sits at **47%**, compared to **37% NMC in retargeting**.
- While promos perform better in retargeting environments, **non-promo ads still outperform promo ads even within retargeting audiences**.

Recommendations :

- Be more conservative deploying promo creative to prospecting audiences.
- Use promotions **strategically within retargeting**, supported by stronger non-promo narratives upstream.

Key Learnings:

- **Memorial Day promotional ads** performed strongly across nearly all key metrics, delivering **39% NMC**.
- **Black Friday (SimpliSafe) creatives** underperformed across all major metrics in 2025, delivering **61% NMC**.

Highlights:

- Overall, UGC static ads underperform, including top performers, indicating limited scalability for static-first UGC.
- Carousel formats stand out as an exception, outperforming other static executions and showing stronger potential.
- Results suggest an opportunity to revisit carousel-based UGC as a more effective static alternative, rather than scaling single-image formats.

Key Learnings:

Across 2025, we identified **nine core messaging themes**.

- **Whole-Home Solutions (WHS)** contribute **69% of spend** and consistently outperforms average across all key metrics, making it the primary growth driver.
- **Full Service Treatment (FST)** represents **7% of spend**, delivers **one of the lowest CPS levels** and **99% lower NMC than average**, indicating strong efficiency with clear upside.
- **What's in Your Water (WYW)** received **<2% of spend** and underperformed overall, despite delivering the **highest CVR**, suggesting message resonance with limited scalability.
- **Benefits-led messaging** underperforms the account average across most metrics.

Recommendations :

- WHS, FST, and HAB lead performance with high investment and low NMC.
- Customer Accreditation shows potential for expansion at low risk.
- BFT, WYW, and WTE underperform with high NMC despite low investment.
- WFE and Custom Solutions combine high spend with high NMC, requiring refinement before further scale.

Key Learnings:

- **90s and Testimonial themes** are the most scalable and performant, capturing **32% and 16% of spend** while delivering strong efficiency at **38% and 36% NMC**.
- **Explainer content** maintains the **lowest NMC** and has consistently driven performance over time, making it a reliable efficiency anchor.
- **Breakout creatives** show strong mid-funnel engagement but require further optimization to improve NMC.
- **Yep** is driving cheap leads but weak lower-funnel metrics.

Recommendations :

- **P1: 90s, Explainer, Testimonial**
- **P2: NotAgain**
- **P3: Breakouts**
- **P4: Yep**

Strategy & Recommendations

Leaf Home Water Solutions

2026 Creative Strategy — Key Pillars

1

Scale Proven Winners

Double down on themes, formats, and creative types that consistently drive low NMC and quality demand.

2

Refine What Shows Potential

Rework underperforming but promising areas (e.g., Customer Accreditation, Yep, Affiliate) with clearer intent and execution.

3

Build a Strong Testing Engine

Establish a disciplined, cross-team testing framework to systematically validate creative ideas and translate results into a scalable playbook.

Scale Proven Winners

Scale Product-Focused Creator Content

Why

- Creator Content drives the strongest performance across the funnel, accounting for **57% of spend with 42% NMC**.
- **Product-focused creator ads outperform** faucet-only or environment-based visuals.

What We Recommend:

- Prioritize **product-focused, homeowner-led** storytelling in all creator briefs.
- Emphasize the **core message within the first 3 seconds** (hook-first execution).
- Continue and expand partnership with **Phil** as a proven high-impact creator partner.

Scale Product-Led Core Creative

Why

- Long-running Core ads built on testimonial and explainer frameworks (**since 2023**) continue to deliver efficient performance.
- **Product visibility** consistently outperforms abstract or lifestyle-only messaging.

What We Recommend:

- Produce **new Core creatives using proven testimonial and explainer frameworks**.
- Focus messaging on WHS and FST as primary narratives.

Scale Video-First Storytelling

Why

- **Video is the most scalable** and performant format across the funnel.
- Winning creator and core ads consistently use strong visual storytelling and early hooks.

What We Recommend:

- Lead production with **video-first concepts** across buckets.
- Design for hook in **the first 3 seconds with immediate product and homeowner context**.
- Use static, carousel, and other formats selectively for testing and support.

Refine What Shows Potential

Optimize Yep Creative for Down-Funnel Performance

Why

- Approximately \$700K in spend has gone into this bucket, with many ads **driving strong CTR and attention**.
- However, performance weakens down-funnel, indicating **strong interest but lower lead quality**.

What We Recommend:

- Evolve high-engagement ads by introducing **creator presence and homeowner context**.
- Add **clearer product and value messaging** to improve down-funnel efficiency.
- Rebuild winning UGC concepts into more **conversion-oriented executions**.

Refine Affiliate Creative with Proven Sales Signals

Why

- Affiliate ads show **promising NMC and sales volume**, despite performing slightly below benchmark on other metrics.
- Results suggest strong transactional intent with room for creative optimization.

What We Recommend:

- **Iterate on top-performing affiliate ads** rather than net-new concepts.
- Align affiliate messaging more closely with **product value and quality demand**.

Promotional Creative by Funnel Stage

Why

- Promotional ads perform **~10% better NMC in retargeting than in prospecting**.
- This indicates that different creative messages work better at different stages of the customer journey.

What We Recommend:

- **Apply an AIDA-based creative approach:**
Awareness: non-promo, value-led storytelling
Interest/Desire: product and proof
Action: promotional offers in retargeting
- Design **distinct creative sets for each audience stage**.

Build a Strong Testing Engine

Objective

Create a structured, cross-channel testing system that turns experimentation into clear learnings and a repeatable creative playbook.

Media Team

What We Recommend:

- Establish **weekly creative performance share-outs** and **monthly learning reviews**.
- Apply **consistent benchmarks and graduation criteria across channels**.
- Enable **cross-channel learning** (Social, Programmatic, Search) to identify scalable patterns.

Creative Team

What We Recommend:

- Develop **clear testing hypotheses** for every new concept (what is being tested and why).
- **Translate performance learnings into iterative creative briefs**.
- **Design creative variations intentionally** (hook, message, format), not randomly.

Product Team

What We Recommend:

- Partner on **defining core value propositions and message priorities**.
- **Align creative testing with product narratives and customer insights**.
- **Consolidate learnings into a shareable playbook** to guide future creative development.
